VOLUME 34: No. 16

In a Little League game played at Carbon Tuesday, Carbon shut-out Three Hills 4-0.

On May 17th a surprise party was held at the home of Mr. and Mrs. Ed Ohlhauser in honor of Mr. and Mrs. Matt Kary's silver wedding anniversary. An enjoyable evening was spent in watching TV. A delightful lunch was served by the hostesses, after which a suitable gift was presented.

We regret the passing of one of our old timers, W. (Butch) Leitch on Sat., May 14. We expect to have a more complete account of his passing in a future issue.

The ball game played at Grand Forks on Wed. evening against Sunnyslope ended with a 6-2 score in favor of Carbon.

Mr. and Mrs. C. H. Nash were holiday visitors at Stettler.

Mr. and Mrs. Wofer of Medicine Hat were holiday visitors at the homes of their daughters and sons-in-law, Mr. and Mrs. John Diede and Mr. and Mrs. Theo Harsch.

Rev. and Mrs. J. G. Roberts and children, and Mrs. Harry Hunt attended the service of the laying of the cornerstone for St Magloire's New Church at Drumheller on Wed. Bishop Calvert dedicated it. A reception was held after the service at the home of Mr. and Mrs. Tom Campbell.

The C.G.I.T. held a Mother & Daughter Tea Wed., May 25th. They had a social evening, slides showing camp life, and a reading by their leader Mrs. Mary Prowse followed by a very delightful lun-ch.

Mrs. Irma Flint and two boys of Penhold are visiting at the home of her mother, Mrs. E. Mc-Alpine.

Mrs. Mary Prowse has taken her C.G.I.T. Group to spend the weekend camping at Pine Lake. They are to be joined by the Three Hills group. Let us hope they have nice weather.

Mrs. Ben Fox attended the I.O.D.E. Provincial Executive meeting held at the Palliser Hotel, Calgary last week. Mrs. Fox was elected 6th Vice-President at this meeting.

The Home and School will hold its regular monthly meeting on Thursday, June 2nd at 8 p.m. in the school auditorium. Election of officers will take place and all members are urged to attend if possible and vote in this election.

Mr. and Mrs. Wm. Robinson are attending the Lions Convention being held in Calgary this week.

B. Stubbert Sr. and Mr. DeChene have both returned home after their operations in Drumheller hospital.

Miss Doreen Stoen of Calgary was a weekend visitor at the home of Mr. and Mrs. Alfred Fox.

Mr. and Mrs. Leon Coates, Ione Mr. and Mrs. E. Maxwell, Mr. and Mrs. Hartley Hay, Mr. and Mrs. R. D. Barnes and Al all attended the funeral of the late Andy Barnes at Granum on Thursday.

I.O.D.E. EMPIRE DAY ESSAY CONTEST AWARDS

Presentation of awards was made to winners of the I.O.D.E. Empire Day Essay Contest—"Alberta's Progress and her Golden Jubilee" at a ceremony in the Carbon School Auditorium on Wednesday afternoon, May 25th. Judging of the essays was done by Mrs. Muller, Mr. H. Isaac, and I.O.D.E. member Mrs. Albert Bramley who kindly filled in for Mrs. Coates at the last minute as she was suddenly called away.

Mrs. Ed. Ohlhauser, I.O.D.E. Educational Secretary, presented 50th Anniversary pins to the winners in the following classes:

Grade 1, Nigel Roberts.
Grade 2, Judy Appleyard.
Grade 3, Barry Stubbert.
Grade 4, Carol Ann Downe.
Grade 5, Susan Hoivik.
Grade 6, Myrna Anderson.
Grade 7, Robert Hood.
Grade 8, Gail Schmierer.
Grade 9, Wayne Garrett.
Grade 10, Wayne Dresser.
Grade 11, Wilbert Bauer.
Grade 12, Jo Ann Ohlhauser.

Besides the reading of the essays, the program included two songs by the girls and boys of the 1st division, accompanied by Mrs. Kaiser. Mr. Isaac also gave some helpful comments from the judges' point of view.

The Students' Union also presented a silver cup to Valerie Tetz for obtaining the highest marks for girls at the Acme Track Meet.

Don't forget the I.O.D.E. Dance June 17th.

ANGLICAN NOTES
CHRIST CHURCH, CARBON

Sunday, May 29th, Whitsunday Evening Prayer at 7:30 p.m., followed by vestry meeting.

Sunday, June 5th, Trinity Sunday Confirmation at 7:30 p.m.

CONFIRMATION—Please make a special note of the date and time of the Confirmation Service. The Confirmation will be conducted by Rt. Rev. G. R. Calvert, Lord Bishop of Calgary. There will be a short reception thereafter.

All parishioners should make a special effort to witness at the Confirmation. The goodwill of all of us is a great help to candidates at this momentous point in their lives.

REV. J. G. ROBERTS, VICAR

A bargain is something you cannot use at a price you cannot resist.

THINKING ABOUT PROFITS ?

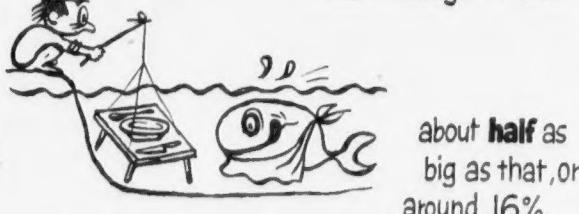

The people
who conduct
public opinion polls

asked a large
number of Canadians this question:

"How big a profit do you think the average Canadian company makes?" Most people thought it was nearly 28% on the income dollar.

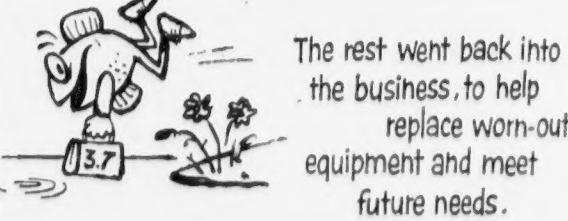

Then these people were asked what profit they thought a company ought to make. Most of them thought it was

about half as big as that, or around 16%.

Actually, Imperial's profit last year was less

than one-third of what people thought we made, or a little more than 8%. Of this, just over 4% was distributed to Imperial's shareholders.

The rest went back into the business, to help replace worn-out equipment and meet future needs.

IMPERIAL OIL LIMITED

GARDEN NOTES—**Cultivating easier, quicker if long-handled tools used**

Cultivation of the garden, even a large one, need not and should not be a back breaking chore. It is amazing how much easier and quicker the job is done with tools that have long handles. Of course, for getting in close to tiny flowers or vegetables, for weeding and a few other delicate jobs, it may be necessary to get down on knees or knee pads but with a little care a great deal of the ordinary cultivating and planting jobs can be handled with a minimum of stooping.

Keep planting

Too much emphasis cannot be laid on spinning out the planting. It is much better to plant a little every week for a month or so than to try and get everything in at once. There is no good reason why most vegetable and a lot of flowers cannot be planted for many weeks yet and this gradual planting will produce far more satisfactory results than sowing or setting out all at once.

The vegetable garden particularly, should be planted gradually with only a portion of the carrots, beets, beans, corn, etc., sown at one time.

In the flower line, experienced gardeners will sow such things as zinnias, petunias, asters, cosmos and other annuals in little plots here and there in the flower garden. When these come up they will leave only a few plants in the original position and transplant the surplus to other parts of the garden.

Handled carefully, these transplants will come along almost as quickly as those left untouched and thus a large flower garden can be planted at trivial cost.

Not too deep

Almost every one is inclined to plant far too deeply. With tiny seed such as that of lettuce, carrots, cosmos, zinnias, poppies, and alyssum, which are not much larger than the head of a pin or

Funny and Otherwise

Hi: "Did you have fun at the party?"

Fi: "Yes, we played musical chairs the hard way."

Hi: "How's that?"

Fi: "Without chairs."

The noon whistle had blown when Murphy shouted, "Has anyone seen my vest?"

Pat: "Shure, Murphy, and ye've got it on."

Murphy: "That I have (gazing at the garment), and it's a good thing ye seen, or shure and I'd have gone home without it."

People are funny. They spend more money they don't have to buy things they don't need, to impress folks they don't like.

A wholesaler wrote a storekeeper a letter of thanks for a recent order, but reminded him that it would not be possible to ship the order until the amount outstanding on the books had been paid.

The storekeeper wrote back: "Please cancel my order. I can't wait that long."

Two vacationists, meeting at the first tee of a hotel golf course, formed a two-some. On the ninth hole one of them said, "That's my wife over there playing with an old hag she dredged up somewhere."

The second man replied casually, "You know, I was about to say the same thing."

Properly timed poultry production said important

REGINA.—Frank Payne, Saskatchewan Poultry Commissioner, has released figures indicating an optimistic future for poultry raisers.

"Available data indicates that both egg producers and poultry meat producers are more conservative this year than last in formulating their production programs," he said.

Figures compiled by the department show the monthly chick-hatch since last October, has been consistently below that of a year ago. In the first quarter of the current year there were 12 percent

fewer chicks hatched than last year. There were 11 percent fewer turkeys eggs in incubators at the end of March this year than on a like date in 1954.

"Canadian storage stocks of poultry meats are at a fairly low level," said the commissioner, "and American forecasts are for a slightly lower level of production for 1955. Taking these and other factors into consideration a condition of cautious optimism prevails in the industry."

"A poultry product produced by a properly timed program, good feeding and sound management practices will pay a reasonable return on investment this year," he said.

A calorie is a unit of heat.

Walnut Buttermilk Loaf

Mix and sift twice, then sift into a bowl, 2½ c. once-sifted pastry flour (or 2¼ c. once-sifted all-purpose flour), 2 tsps. Magic Baking Powder, ½ tsp. baking soda, 1½ tsps. salt, ½ tsp. ground mace. Mix in ¾ c. lightly-packed brown sugar, ½ c. rolled oats and 1 c. broken walnuts. Combine 1 well-beaten egg, 1 c. butter-

milk, 2 tsps. grated orange rind, 1 tsp. vanilla and 5 tbs. shortening, melted. Make a well in dry ingredients and add liquids; mix lightly. Turn into a loaf pan (4½" x 8½") which has been greased and lined with greased paper. Bake in a rather slow oven, 325°, about 1 hour. Serve cold, thinly sliced and lightly buttered.

3 different Cheese-flavored Treats from One Basic Dough!

Clever one-oven tricks

with FLEISCHMANN'S YEAST!

One dough—one oven—three kinds of flavor-thrilled baking! It's easy to be a whiz when you start with Fleischmann's Active Dry Yeast. Risings so sure, so fast—results so light and appetizing! If you bake at home, be sure you have plenty of Fleischmann's on hand.

BASIC CHEESE DOUGH**Scald**

1½ cups milk

3 tablespoons granulated sugar

2 teaspoons salt

3 tablespoons shortening

Remove from heat and cool to lukewarm. In the meantime, measure into a large bowl:

½ cup lukewarm water

1 teaspoon granulated sugar

and stir until sugar is dissolved. Sprinkle with contents of

1 envelope Fleischmann's Active

Dry Yeast

Let stand 10 minutes, THEN stir well. Stir in lukewarm milk mixture.

Stir in

2½ cups once sifted bread flour and beat until smooth and elastic; stir in

1½ cups lightly-packed shredded old cheese

Work in

2½ cups more (about) once-sifted bread flour

Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into portions and finish as follows:

**1. CHEESE LOAF**

Shape half a batch of dough into a loaf and fit into a greased bread pan about 4½ by 8½ inches. Grease top. Cover and let rise until doubled in bulk. Bake in a moderately hot oven, 375°, about 40 minutes—cover loaf with brown paper during latter part of baking to avoid crust becoming too brown.

2. MARMALADE BRAID

Roll out a quarter of a batch of dough into an 8-inch square on a lightly-floured board; loosen dough. Spread with ½ cup marmalade and sprinkle with ½ cup chopped nuts. Roll up jelly-roll fashion; seal edge and ends. Roll out into an oblong 9 inches long and 3 inches

wide; loosen dough. Cut lengthwise strips to within an inch of one end. Braid strips; seal the ends and tuck them under braid. Place on greased cookie sheet. Grease top. Cover and let rise until doubled in bulk. Bake in a moderately hot oven, 375°, about 20 minutes.

3. CHEESE BREAD STICKS

Cut a quarter of a batch of dough into 12 equal-sized pieces and roll, one at a time, into slim strips about 7 inches long. Brush strips with water and roll lightly in cornmeal. Place, well apart on greased cookie sheet. Cover and let rise until doubled in bulk. Bake in a moderately hot oven, 375°, about 15 minutes.

International helicopter service is "looking up"

Proves to be fastest mode of travel for short distances

Europe's oldest railroad station, in Brussels, Belgium, is now helicopter line's central heliport.

BRUSSELS.—The world's first international scheduled helicopter passenger service — now in its second year of successful operation from this bustling Belgian capital — may herald the beginning of the much-predicted "helicopter era."

By autumn (the second anniversary of the inaugural flight) an estimated 40,000 passengers will have been carried over the 1,600-mile helicopter network which links Belgium, Holland, Germany and France.

Exploratory flights have also been made to London and Milan; and regular service to the British capital as well as Paris is slated for the future.

Operating the octopus-like pattern of "rotor-routes" which radiate from Brussels is the pioneer world airline with the complicated name, (Societe Anonyme Belge D'Exploitation De La Navigation Aérienne) which is officially called "Belgian Airlines" but more familiarly is known as "Sabena."

The helicopter service has proven itself to be the fastest mode of travel for short distances of up to 200 or 250 miles between large population centers.

It has been found that total elapsed helicopter flight time from "city centre to city centre" is much less than a journey by fixed-wing airplane which includes two long rides in airport buses. In addition, on different helicopter routes the flight time has proven from one to three hours faster than existing surface transportation.

A Brussels businessman leaving his office as late as high noon, can easily catch the 12:70 p.m. "Rhineland Rotor Express" for the West German capital of Bonn

Strictly Fresh

Soviet hoboes can now hitch train rides without fear of being jailed — jail term for the offence has been abolished. But if they can't pay a 100-ruble (\$25) fine into the clink they go. That's a prime example of "bum" Communist justice.

At the rate they've moved up the Christmas shopping season for the last several years, this

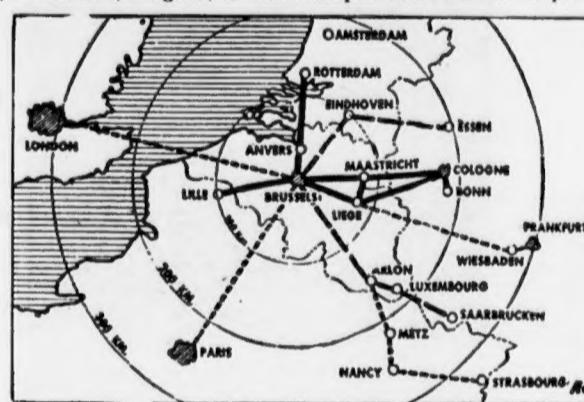

year we should see Santa Claus arriving in town on a First of July rocket.

Fashion note from Miami Fla.: Police report that sale of revolvers and automatics zoomed over 100 percent during a recent week. All the boys felt they needed a new spring shoot.

Fellow in Downey, Calif., arrested for travelling 100 mph, said he promised his wife to be home at 2 a.m., was two minutes behind schedule. He'd apparently rather be in the jug than have one thrown at him.

Burglar in Omaha, Neb., made off with a gas stove, chest of drawers, bookcase, bed springs, mattress and a set of children's books. Setting up light-fingered housekeeping?

Present lines shown solid. Broken lines represent proposed ones.

(131 miles away) for a late luncheon and signing of a contract with a German businessman.

Sabena at present flies separate helicopter schedules to Liege (45 minutes) and Maastricht, Holland (50 minutes); Cologne (95 minutes) and Bonn (110 minutes) in Germany; to Lille (55 minutes) in France; and a northern route to Antwerp (20 minutes) and Rotterdam, Holland (65 minutes).

Future routes are planned from Brussels across the English channel to London; southwest to Paris; and southeast to Luxembourg; Metz, Nancy, Saarbrücken, and Strasbourg. Also a northwest route to Eindhoven and Essen; and an extension from Liege to Wiesbaden and Frankfurt.

An enormous "helicopter potential" is based on the fact that more than 70 million persons live within an approximate 200-mile radius of Brussels.

Sabena uses 7-passenger Sikorsky S-55 helicopters, built in the United States, on all routes and fares are the same as regular tourist airliner. All helicopter flights stop for a minute or two at the Melsbroek national airport in Brussels for connections with large airliners. Saben's regular international routes serve 32 countries and 86 cities, as far as New York, Tel Aviv, Israel, and Johannesburg, South Africa.

Anselme Vernieuwe, Saben's operational manager (and the

"sparkplug" behind the helicopter service) predicts that eventually the helicopter will:

- Replace fixed wing aircraft for short trips between large cities.

- Provide fast "aerial bus service" to airports for long flights on huge fixed-wing airliners.

- Compete directly with ground transportation for both passengers and freight.

Within several years, Vernieuwe believes, twin-engined helicopters will be carrying 30 to 40 or more passengers over even greater distances than at the present.

All heliports are located very near the "heart" of each city, and in most cases the "city fathers" provided land and building facilities at their own expense.

There's an historical "twist" in the establishment of Allee Verte heliport in downtown Brussels. This station, now used by air passengers, is the oldest railway station in Europe—from which the first railway trip on the continent started just 80 years ago, in 1835. One might be tempted to remark that the transportation business is "looking up!"

BIG BABY

No land animal living today attains a weight at maturity that equals the weight of the blue or sulphur-bottom whale at birth.

One of these infant whales is known to have weighed eight tons.

Farmers in N.W. Manitoba report weeds increasing

Completion of a two-year study of weed problems by the Manitoba Weeds commission indicates that weeds are still on the increase on more than 50 percent of the farms in the area surveyed.

The area under study covered northwestern Manitoba from just south of the Riding Mountains northward, including the Swan River valley. The soil within this area is varied in character, being generally black-earth to gray-green.

The Weeds commission was assisted in the survey by the United Grain Growers Ltd., Line Elevators Farm Service and Manitoba Pool Elevators. Some 321 farmers representing more than 1½ million acres of land under cultivation, co-operated by returning questionnaires.

Less than half

Slightly less than one-half the farmers replied that they considered weeds a serious problem on their farm.

To the question "Have weeds increased the last several years?"

Well fed bees give increased production

REGINA.—S. E. Bland, assistant provincial apiculturist, in the Plant Industry branch, Saskatchewan department of Agriculture, said that if more beekeepers would feed their bees not merely to keep them alive, but to obtain maximum strength, their honey production would probably increase by fifty percent.

"Package bees are now arriving from the southern States," he said, "and much will depend on the care they receive this spring."

"It is a mistake to think bees can obtain all their requirements from spring flowers. The colony established by means of the two-pound package is a weak colony and on days suitable for flying, that colony can spare only a few bees for foraging since large numbers must remain in the hive to tend the larvae and keep the brood warm. The colony must wait for three weeks before the first young bees emerge to help the hive's activity," he said.

"Wise beekeepers aid their package colonies by placing within the hive the stores required for uninterrupted brood rearing. If the colony does not have eight frames of brood by June 1, something is wrong with the bees or the beekeeper and the chances are the beekeeper has again underestimated the amount of food his bees are capable of using," said Mr. Bland.

TWIN CALVES

CHILLIWACK, B.C.—Twin calves were born for the fourth year in a row to the same Holstein cow on the farm of Aesop Eckert. They were a bull and a heifer, the same as in 1952. Last year the twins were heifers.

Supersonic refers to speed faster than sound.

163 of the questionnaires reported "yes."

Troublesome weeds were listed in order of seriousness as follows: Wild Oats, Wild Mustard, Quack Grass, Canada Thistle and Perennial Sow Thistle.

While 53 percent of the farmers rated Wild Oats the most troublesome and difficult weed to control, the occasional farmer stated that this weed was less serious on his farm than it was a few years ago.

To the all-important query as to how Wild Oats were being controlled, more than 75 percent of those replying depended upon late fall cultivation with seeding delayed to destroy one of two growths of the weed and then seeding to barley.

A considerable number stated that the previous year's summer fallow was being handled in the same way if it was host to Wild Oats.

The occasional farmer was finding fall rye helpful and a few stressed the need for mowing a plowed crop for feed rather than allowing the wild oat seed to ripen and shed.

The number using grass-legume mixtures for wild oat control was "regrettably few," stated H. E. Woods, chairman of the Manitoba Weeds Commission.

A question relating to the seriousness of specific weeds drew replies as follows: Canada Thistle, rated serious by 28 percent; Wild Buckwheat, 21 percent; Hemp Nettle, reported by only nine farmers.

Britannia trials "most" satisfactory

The Britannia airliner has been recently on high altitude and tropical trials in Africa. On 13th April it landed at Bristol after flying from Khartoum in 10 hours 55 minutes. Test pilot Walter Gibb described the trials as "most satisfactory."

The aircraft, which carried 45 technicians, had been away since 12th March. Gibb reported that the Britannia flew for 91 hours and the test program was finished in less than the five weeks allotted. The highest altitude at which the plane flew was 30,000 feet. Gibb added: "We have proved to our own satisfaction that all 'paper figures' on its expected performance were correct, although of course we have a mass of data and statistics which still have to be analysed."

Overseas the Britannia has been christened "Whispering Giant"—a tribute to her silence in flight. Sir Miles Thomas, the Chairman of the B.O.A.C., sent a message to the Bristol Aeroplane Company saying: "Encouraging performance indeed happy augury for this new British product — world's first large turbo-propeller long range airliner." B.O.A.C. is acquiring 33 Britannia aircraft.

Ham and Chicken Get Along Beautifully in This Casserole

BY DOROTHY MADDOX

BOTH ham and chicken are plentiful and economically priced at this time. So it's the right time to try this tasty combination of the two. It is prepared with economical nonfat dry milk, which provides real milk nourishment without fat. Rich in protein, calcium, riboflavin and lactose, a one-pound package, with a protective foil lining, yields five full quarts of nonfat milk.

Ham and Chicken Casserole (Makes 6 to 8 servings)

One and one-half cups water, ½ cup nonfat dry milk, 3 tablespoons flour, 1 teaspoon salt, dash pepper, 1 tablespoon Worcestershire sauce, ½ package (¼ pound sharp process cheese slices, cubed), 2 cups cooked rice (¾ cup uncooked), 1 cup diced cooked ham, 1 cup diced cooked chicken, 1½ cups cooked lima beans, 1 can (3-ounces) mushrooms, drained; 2 tablespoons diced pimento.

Pour water into top of double boiler. Sprinkle nonfat dry milk powder, flour, salt and pepper over surface; add Worcestershire sauce. Beat with rotary beater until smooth. Add cheese.

Cook over hot water, stirring constantly, until slightly thickened. Combine remaining ingredients in 2-quart casserole. Pour cheese sauce over mixture; stir until just blended. Bake in a moderate oven (350 degrees F.), about 30 minutes, or until mixture begins to bubble.

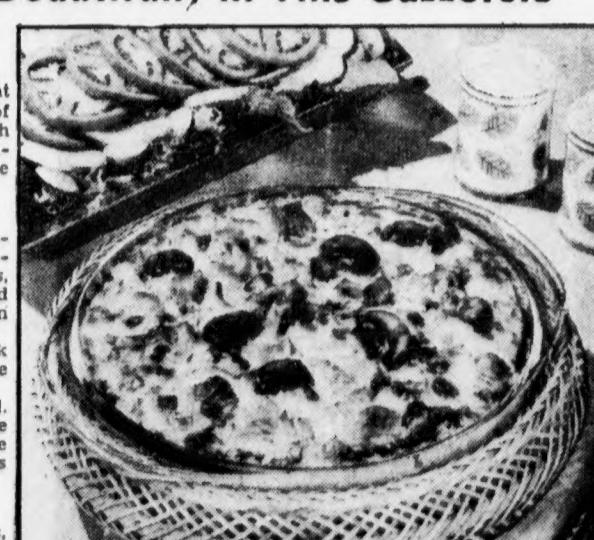

Ham and Baked Beans (Yield: 12 servings)

Four cups (2 pounds) dried beans, cold water, 2 medium onions, sliced; 4 teaspoons salt, ½ cup catsup, ½ cup unsulphured molasses, 2 tablespoons vinegar, ½ teaspoon Tabasco, 2 teaspoons dry mustard, one 4-pound ham shank.

Wash beans. Cover generously with cold water; soak overnight. Add onions and salt. If necessary, add additional water to cover beans; bring to boiling point in covered saucepan. Simmer 1 hour.

Drain and save 3 cups bean liquid, adding water to make 3 cups if necessary. Mix bean liquid with catsup, unsulphured molasses, vinegar, Tabasco and dry mustard.

Place ham in pan or large earthenware casserole which can be

Ham and chicken simmer in harmony in this tasty, economical casserole treat for you.

covered. Put beans around ham; add liquid mixture. Bake in slow oven (325 degrees F.) 1 hour and 20 minutes. Uncover; remove ham.

Remove rind from ham, cut into medium size pieces; reserve. Bake beans uncovered 1 hour and 40 minutes longer.

Add ham pieces during last 30 minutes of baking.

Davidson's Jubilee oxen assist at wedding party

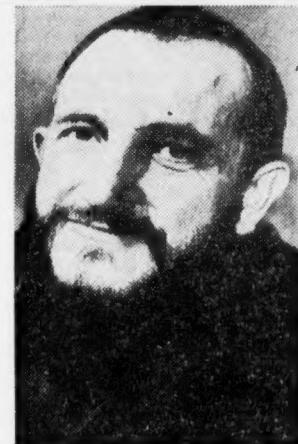

When anything of importance happens in Davidson now-a-days, the local Jubilee Committee are right in there with both feet—but this time it is with both oxen. When Ann Prpic and "Dude" Unsbee chose April 18th in the Jubilee year for the big event, their plans for a quiet escape from their many friends were

fouled. The local boys duplicated their car keys and removed the wedding car from in front of the church and replaced it with the Jubilee oxen, and transported the happy but very surprised newly weds through town. That chap under the top has is Frank Spratt, the official keeper of the Jubilee oxen.

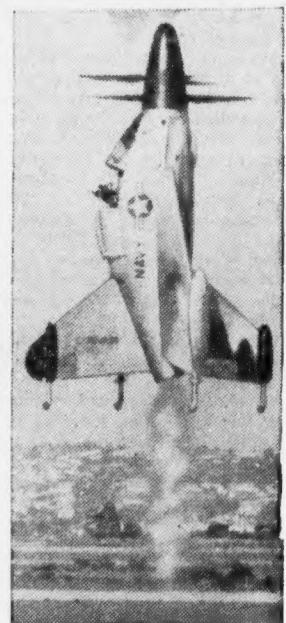

REMEMBER THE FIRST ONE? All the joy of childhood at a first-time treat is mirrored by, left to right, Wim, 13, Nellie 6 and Leendert Hordijk as the trio from the Netherlands taste their first hot dogs. They're shown in Chicago, Ill., where the Hordijk family broke a cross-country journey en route to a new home in California. The Hordjiks have been given a farm as a mark of gratitude for sheltering five Jewish refugees from the Nazis during World War II.

ABBE PIERRE, the French priest whose campaign to assist thousands of homeless persons won the attention of Parisians last year, arrives in New York to begin a lecture tour.

SITTING PRETTY: There's no wrinkle to this new wrinkle in travel apparel. It's a skirt with overlapping panel at the back which wearers can unbutton while seated. Inner panel gets the wrinkle treatment, leaving flannel skirt wardrobe fresh at end of journey.

STRAIGHT UP — Navy's "Pogo Stick," Convair-built vertical takeoff plane, hovers over Lindbergh Municipal Airport near San Diego, Calif., while its pilot tests a new instrument which records rate of decent, helps him to make bounces landings.

HER MARRIAGE BEING ARRANGED—The marital future of 14 year old Princess Shahnaz Pahlavi, who is a student at a boarding school in Liege, Belgium, is being arranged by her father the Shah of Iran. The prospective groom is 19 year old King Faisal of Iraq. The Princess is the daughter of the Shah by his first marriage to Princess Fawzia, sister of ex-king Farouk of Egypt. The engagement has not yet been announced officially and the marriage will probably not take place until the Princess is 16.

FOUR MONTREALERS chart the course they expect to follow in an attempt to cross the Atlantic on a 26-foot raft. Left to right, are: Paul LaPointe, Henri Beaudout, Bernard Sorieul, Gaston Vanackere. They plan to leave Montreal June 5.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

The playing "away" problem

Many athletes have much difficulty playing their best when they do not play in their home arena or stadium. For example; read the other day that Montreal Canadiens are a very poor "away" team.

This is very interesting and is a subject that such psychologists as Coleman Griffith have spent much time studying. It appears that the ability to play equally well away and at home depends on your general make-up. Some people, due to their nervous and emotional temperament, find it more difficult to adapt themselves to new and different circumstances. This is very obvious socially. For example, some people when they go to a party or meet new friends through group or school activity, are completely at ease—whereas others find it difficult to "be themselves" under these new circumstances. Some individuals can meet new people and feel quite at home but others will be ill at ease and tense.

In the case of the athletes playing away from home they become conscious of the same sort of thing plus the fact that they have a feeling that they are not amongst friends and that the spectators will be antagonistic towards them. All this creates a feeling of strangeness and difference that affects the ability to play as efficiently.

The fundamental reaction that causes the inefficiency is tension because when you are not at ease in your surroundings you are usually tense—both nervously and as far as your muscles are concerned. Those who have trouble

in this respect should do the following things:

- Always try to get to the scene of action as early as possible before the game or competition so you can get used to the surroundings.

- There should be a long warm-up before the game or competition in order to get adjusted to the new type of crowd noises and crowd reaction generally.

- Every attempt should be made to develop a relaxation technique to loosen up the tension that will develop due to the difference in surroundings and environment. A team with the reputation of a "road or away team" is usually one that has a lot of athletes of the type who adapt themselves easily to different circumstances. The Detroit Red Wings are a good example of such a team.

SMILE OF THE WEEK

Girl child: "Mother, do men go to heaven?"

Mother: "Yes, darling."

Girl child: "I never saw an angel with whiskers."

Mother: "That's because they get in by a close shave."

COASTAL ISLAND

Lulu Island at mouth of the Fraser in British Columbia is 13 miles long with maximum width of six miles.

WEEKLY BIBLE COMMENT

ST. PAUL GAVE US INSIGHT ON ENDURING RICHES

St Paul wrote a great deal that is deep in perception and thought. With meditation, much of practical wisdom can be gleaned from his writings to inspire us today.

Of particular import are his passages which mention money and possessions. In perhaps his most remarkable passage on this subject, he sets forth, in Ephesians, the fact and doctrine of the Christian's wealth:

"Therefore let no man glory in men. For all things are yours; whether Paul, or Apollos, or Cephas, or the world, or life, or death, or things present, or things to come; all are yours; and ye are Christ's; and Christ is God's."

A cynic might say that such wealth won't do you much good in paying the doctor and hospital bills. That is true, and no one was more aware of it than Paul. He was a sound, practical economist in the ordinary things of daily life and need.

He was a great proponent of organized relief, and gathered funds from the better-to-do Christians in successful trades for the relief of their poorer brethren, especially in the church at Jerusalem, where the poverty of Christians seems to have been a pressing problem.

No true Christian can ignore the social problems of poverty and need, or minimize the ways and means of solving it. There is no blessedness about worldly poverty.

Nevertheless, the Christian's wealth of which Paul wrote was real, even if it was not material.

And the free grace of God is the freest, richest thing of all. What Paul wrote stands as a supreme invitation and a supreme fact.

38,000 Classrooms needed in 10 years

To provide for the increased school population of Canada 10 years hence, 38,000 new classrooms will be required and an equal number of additional teachers.

At present costs, points out The Financial Post, this will involve a capital expenditure of \$750 millions for new buildings and an an-

nual expenditure of \$100 millions in teachers' salaries.

There may be a difference of opinion as to how we will raise the money for those bills, says The Post, but at least on one point every sensible person must be agreed. Something drastic and very basic has to be done. This vital problem just won't evaporate nor will it be solved by inaction.

No benefit from tillage at depths greater than needed for weed control

REGINA.—Earl Johnson, soil specialist with the plant industry branch of the Saskatchewan department of agriculture, said recently experiments conducted in the province had shown no benefit from tillage at depths greater than that necessary for weed control and seed bed preparation. Mr. Johnson was commenting on the deep tillage discussion prevalent following the introduction of heavy duty cultivators by a number of machine companies.

"Tillage of farm land is not an exact science. The best methods of tillage vary with moisture condition, soil type, cropping history and weed growth." He said, "Any specific recommendation to fit any and all farms is, therefore, not practical."

"During the past four years, workers at the Swift Current Experimental Station have compared summerfallow worked four inches deep with other fields worked to a depth of 12 inches. There was no difference in the amount of moisture stored by the two methods. Crop yields following the summerfallow showed no difference between deep cultivation and standard cultivation of summerfallow."

Requires more power
"Deep cultivation required more

power and is more expensive. Since no increase in moisture saved, or crop yields has been obtained by deep tillage of summerfallow the added expense is not justified on summerfallow," said Mr. Johnson.

He also stated that the development of any type of "hard pan" is not widespread on Saskatchewan soils. There may be a slight to moderate "tillage pan" in some areas at a depth of three to four inches. It is possible that the use of a cultivator with chisel or spike points to work just through this layer, when the soil is dry, may be beneficial. However, tillage experiments in the United States have shown that shattering of this pan by mechanical means is effective only when the soil is dry after harvest.

Deep cultivation is not satisfactory for control of wild oats and other annual weeds, Mr. Johnson said, since annual weed control depends on making the seeds grow and deep tillage buries them too deep for germination.

Farmers should not adopt deep tillage until they have tested results. By comparing standard depths of tillage side by side in the same field with deep tillage, a farmer can find whether there is any benefit.

Excessively shallow tillage, is, of course, unsatisfactory. Machinery must be operated at a depth in the soil to give a complete weed cut. Very shallow tillage usually results in pulverization.

Poultry Jubilee meet, Saskatoon opens June 23

REGINA.—W. H. Horner, Saskatchewan deputy minister of Agriculture, will officially open a Poultry Jubilee Conference in Saskatoon, June 23.

The conference will be sponsored by the Saskatchewan Poultry association and will be highlighted by the attendance of distinguished visitors who were associated with early poultry industry in the province. It will last for two days.

Among those to be present will be Prof. E. A. Lloyd, the first poultry graduate of the University of Saskatchewan, who is now in California; A. D. Davey, chief of the federal marketing and production services; Dr. Hedley Auld, former provincial deputy minister of Agriculture, and Dr. George Jaap, a distinguished graduate of the University of Saskatchewan now at Ohio State University.

A program for turkey producers is being arranged by P. M. Blakely secretary of the Saskatchewan Turkey association.

Further particulars may be obtained by writing E. M. Campbell, secretary of the Saskatchewan Poultry association, department of Agriculture, Regina.

Quick Canadian Quiz

- What Canadian lake yields North America's largest annual catch of trout and whitefish?
- What percentage of Canada's waterpower resources have been developed to date?
- Does revenue from individual income taxes represent two-thirds, one-half or one-quarter of Ottawa's total annual tax revenues?
- What are the highest and lowest temperatures on record in Canada?
- Do Canadian railways receive more revenue from freight or from passenger traffic?

(Answers in another column)

Refrigeration

Certain kinds of food such as meat products, dressings, poultry and gravies should always be kept under refrigeration until ready to serve. Moist sandwich fillings and creamy custard filling for pastry must not be kept at room temperature for much over an hour or two. Unless kept very cold, these moist foods may hold germs of food poisoning. It is a good idea to remember to keep cold foods very cold and hot foods very hot until they are served—room temperature can be dangerous.

Those who favor Golden Ball, both in Alberta and southern Saskatchewan, claim for it, yield under dry conditions, saw-fly re-

To prevent the curdling of milk when boiling it try adding a pinch of baking soda to the milk when boiling.

To bleach white goods wash in the usual way and then soak over night in one-half gallon of clear water, to which is added two teaspoonsfuls cream of tartar.

If meat, vegetables, or fruit becomes burned, or scorched, and a small piece of charcoal is dropped into the vessel immediately, the scorched taste will disappear.

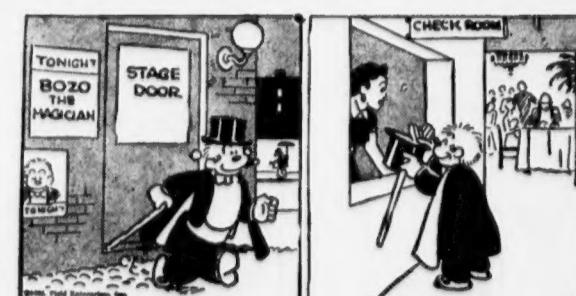

To prevent ash-trays, bookends, and similar articles from scratching the furniture paste blotting paper or pieces of felt on the undersides.

ANSWERS TO QUICK QUIZ

- Passenger traffic earns less than 10 percent of railway income.
- Personal income taxes produce about one-quarter of federal tax revenues. 1. Great Slave Lake.
- High temperature record is 113 degrees, on the southern prairies; low temperature is 87 degrees below zero, in the Yukon. 2. Only about one-fifth of waterpower resources have been developed to date.

BOZO

Make homes safe

Statistics show that homes which should be the safest places in the world, have a shocking accident record. Homemakers can learn a great deal from safety-conscious industries.

In a well-run industrial plant it is likely the top and bottom steps of a flight of stairs will be painted a bright yellow. This is not artistic flair on the part of management. Yellow paint, chosen for its high visibility, is part of the safety color code used in modern plants to warn of accident hazards.

Homemakers can take a tip from industry in putting color to work on danger spots around the house.

The cellar stairs in most homes would make an efficient plant manager turn pale. Even when everything else in the house is gleaming with fresh paint, the stairs to the cellar are often narrow, dark and traffic-worn, with a cluttered landing and, probably no hand rail.

A plant safety supervisor would first of all banish obstructions on the staircase and increase the strength of the lighting.

Then paint would be put to work in the interests of safety.

Ceilings should be white and walls a very light color to reflect as much light as possible. White is the best reflector, but beige, yellow and aquamarine are good. Although light paint on the stair treads themselves may not be too serviceable, the top and bottom steps, where most accidents occur, should be painted the lightest color.

BATS HIGH WITH P.O.—Baseball's legendary Cy Young is still in there pitching—and the U.S. Post Office is catching for him. Congress has voted to keep open the tiny branch office in his home town of Peoli, Ohio (pop. 30), just to handle the volume of mail Cy still receives.

A WEDDING GIFT

I wish you more than merely happiness,
For happiness will be a fragile thing
To shelter you in rain and storm unless
Your hearts possess a stronger covering.
So I would wish you hope and faith and all
The deep sustaining wonderment of prayer.

And if within some darkened hour a tall
Forbidding mountain hides the rising star.
Oh, climb together, climb the rugged hill
And you will see the starlight shining still.
—Grace V. Watkins

FROM A TO Z

The Canadian post office guide runs from Abbotsford, B.C., to Zwicky in the Kootenay region of British Columbia.

Live right—Eat right—Feel right

BABY'S BONE

A daily dose of vitamin D will help to develop strong, normal bones and teeth if administered from birth to the age of sixteen years.

On The Side: • By • E. V. Durding

The average automobile owner and his wife spend 95 percent of the time riding on the front seats of the car. So why have the most comfortable seats in the rear? Why not make the front seats a little more spacious and comfortable plus plenty of leg room for the lengthy autoists?

The stronger sex?

Why do women live longer than men? One reason is said to be that women have a wider variety of interests than men? Anyway, the number of wives who are outliving their husbands continues to increase. In some sections, alarmingly so. The death rate for men used to be only 14 percent higher than the death rate for women. That gap is said to have widened considerably in Florida. It is reported that in recent years 62 percent more husbands than wives have passed on there.

Talkative type

What's the longest you ever heard your wife talk on the telephone? The record for length of a long distance telephone conversation is held by a woman, Dorothy Paget, who once called Doncaster, England, from Germany and talked for four hours!

A good match for "a wolf"

Is calling a woman a "vixen" similar to referring to a man as "a wolf?" So queries a feminine subscriber. A vixen is a female fox. The vixen does all she can to attract male attention, then plays hard to get. She likes to have four or five males battling for her favor. Then she plays one against the other. I would say to refer to a woman as a vixen is to indicate she is a habitual and heartless flirt.

An explanation is in order

Note a reference to engagement rings for men. Why not? It is by no means a new idea. A New Yorker informed me that 20 years ago she presented her then finance with an engagement ring. This ring had a diamond in the middle and a sapphire on each side . . . Sapphire was the recipient's birth stone. Were you presented with a ring by the girl of your dreams when marriage was decided upon? If not, why not? Take this up with the lady in the case and demand an explanation.

OUR COMPLETE SHORT STORY—

Off trail moment

—By LILA LENNON

Lynn turned to Randy Hughes and sighed. "These Arizona sunsets are beautiful, aren't they?"

Randy nodded. "I hope to see a lot of them . . . and of you," he added.

Lynn laughed. "That will be simple enough . . . while you're on the ranch we'll bump into each other often, breakfast, luncheon and dinner."

"How long are you staying?" Randy asked.

"I'm an old dude hand," she replied. "I've been here two weeks, and another two weeks to go."

Randy grinned. "Just getting here this afternoon makes me a brand new dude, doesn't it?"

Lynn turned and looked at him out of the corner of her eye. She liked what she saw . . . very much. Suddenly, the vision of she and Randy riding the horses over the cactus-studded trails . . . the wonderful sunsets . . . it could be perfect!

"Do you ride? she asked.

Randy frowned. "I . . . used to," he said slowly, "but . . ."

"Think nothing of it!" Lynn interrupted. "You'll soon get used to it. When I first came, I hadn't been on a horse for six years, but it's swell now." She added earnestly, "You never really forget how to ride, you know. And, the trails around here are wonderful!"

Randy looked out over the sandy rolling hills. "I'm sure they are."

"You didn't ride up here, did you?" Lynn asked.

"No," Randy replied. "I came up with the others, in the station wagon . . ."

"The view from the top of the mountain road is something you'll never forget," Lynn said dreamily.

"If I saw it with you, I'm sure of that," Randy replied.

Lynn felt little tingles touch her spine. She turned to him eagerly. "Why don't you ride back with me? You can take Snort, she's gentle, and we'll go slowly."

"I don't think I'd better do that," Randy said slowly.

"It will be all right," Lynn assured him. "Whenever we have these outdoor suppers we take turns with the horses . . . station wagon one way, and ride back. But, I'm riding both ways tonight, and I can take Redboy back."

Randy turned to her. "Some other time, Lynn . . . later."

Lynn stared at him. She felt the color rush to her face. "I'm sorry," she said stiffly. "My enthusiasm bubbles over, sometimes."

Randy's voice was low. "Look . . . Lynn . . ." The clang of the bell drowned out his words. Lynn stood up and brushed the sand from her breeches.

"Chow," she said briefly, and walked swiftly away.

"Dope," she said to herself. "It sure takes a house to fall on you. Get it? He just didn't want to ride with you. Well, Mr. Hughes will wait a good long time before I ask him to ride with me again!"

Lynn kept the length of the long wooden table between herself and Randy. She chatted busily with everyone else, but managed to move out of reach every time Randy came anywhere near her.

When it was time to go, Lynn went down to the horses. Out of the corner of her eye, she glanced at Randy. Maybe . . . maybe he'd change his mind. But Randy was keeping a safe distance away.

She mounted Redboy and rode into the road. Joe, the cowboy, came up and patted Redboy's neck. "Careful, Lynn, don't let him out, he's got a tough mouth, and if he gets goin', you won't be able to hold him in . . ."

Lynn saw Randy watching her. "I can handle him," she said clearly. She raised her voice. "Who's riding Snort?"

"Nobody yet," Joe answered.

Helps You Overcome
FALSE TEETH
Looseness and Worry

No longer be annoyed or feel ill-at-ease because of loose, wobbly false teeth. FASSTEETH, an unique alloy line (non-ridged) is coated with a resin which holds them firmer so they feel more comfortable. Avoid embarrassment caused by loose plates. Get FASSTEETH today at any drug counter.

Lynn guided Redboy alongside the station wagon. She turned in the saddle and waved. "See you at the ranch," she called.

The setting sun struck the chrome headlight on the station wagon, and sent a blinding beam glancing off. Redboy jerked, and Lynn tugged at the reins. She knew instantly that it was no use. Redboy kicked the dust and started off at a dead run.

Lynn heard a brief shout behind her, and thought she heard the hard thudding of hoof beats, but despairingly she knew it wouldn't matter. Redboy was the fastest horse on the ranch . . . no one could catch him. She crouched low in the saddle and hung onto the reins. Her hands burned and the tearing wind clawed at her hair . . . there wasn't time to think of anything, then, except staying in the saddle . . . somehow.

Redboy took the curve at the base of the mountain road with flying ease and pounded uphill to the top. Suddenly, he stopped. Lynn let her breath go in a sobbing sigh, and turned weakly in the saddle. Short came tearing around the curve and raced uphill with Randy . . . Randy was riding him!

"Are you all right?" he yelled. "Yes," Lynn called shakily. Randy reined up and dismounted. "You little fool!" he said sharply. "Why did you let him out?"

Indignation swept over Lynn. "I let him out!" she stormed. "I you?" Lynn asked.

"No," Randy replied. "I came up with the others, in the station wagon . . ."

"The view from the top of the mountain road is something you'll never forget," Lynn said dreamily.

"If I saw it with you, I'm sure of that," Randy replied.

Lynn felt little tingles touch her spine. She turned to him eagerly. "Why don't you ride back with me? You can take Snort, she's gentle, and we'll go slowly."

"I don't think I'd better do that," Randy said slowly.

"It will be all right," Lynn assured him. "Whenever we have these outdoor suppers we take turns with the horses . . . station wagon one way, and ride back. But, I'm riding both ways tonight, and I can take Redboy back."

Randy turned to her. "Some other time, Lynn . . . later."

Lynn stared at him. She felt the color rush to her face. "I'm sorry," she said stiffly. "My enthusiasm bubbles over, sometimes."

Randy's voice was low. "Look . . . Lynn . . ." The clang of the bell drowned out his words. Lynn stood up and brushed the sand from her breeches.

"Chow," she said briefly, and walked swiftly away.

"Dope," she said to herself. "It sure takes a house to fall on you. Get it? He just didn't want to ride with you. Well, Mr. Hughes will wait a good long time before I ask him to ride with me again!"

Lynn kept the length of the long wooden table between herself and Randy. She chatted busily with everyone else, but managed to move out of reach every time Randy came anywhere near her.

When it was time to go, Lynn went down to the horses. Out of the corner of her eye, she glanced at Randy. Maybe . . . maybe he'd change his mind. But Randy was keeping a safe distance away.

She mounted Redboy and rode into the road. Joe, the cowboy, came up and patted Redboy's neck. "Careful, Lynn, don't let him out, he's got a tough mouth, and if he gets goin', you won't be able to hold him in . . ."

Lynn saw Randy watching her. "I can handle him," she said clearly. She raised her voice. "Who's riding Snort?"

"Nobody yet," Joe answered.

had nothing to do with it!"

Randy walked over, took the reins and held out his hand. "Here, get off."

Lynn climbed down stiffly. It couldn't be any worse. Randy didn't believe her . . . he probably thought she was . . . oh, well, what did it matter what he thought? She turned to him and stared in amazement.

"What's wrong with your face?" she exclaimed.

Randy grinned briefly. It was a lopsided effect with his eyes swollen almost shut.

"Gruesome, isn't it?" he asked. "But I'm allergic to horses . . . you wouldn't give me a chance to explain."

Lynn sat down weakly. She couldn't think of anything to say.

"You know, a man doesn't usually feel he makes a good first impression with his eyes and face swollen," he mused aloud.

"I'm sorry," Lynn murmured. "I thought . . ."

Randy took her hand. "No. You were on the wrong trail, there, Lynn. But there are other trails, aren't there?"

"Yes," she said softly. "Of course."

Victoria Day
safe driving
being urged

The issuing of a proclamation urging all motorists to give particular care to safe driving over the Victoria Day weekend of May 21, 22 and 23 is announced.

The amount of traffic on highways is increasing steadily from year to year and will be greater than usual during the forthcoming Victoria Day weekend, which is traditionally the first major holiday in which thousands of families take to the highways to visit their summer cottages and other resort areas.

Such heavy traffic often results in accidents which cause property damage, personal injury, loss of life and a waste of resources. Seventy-four persons met death as a result of traffic accidents in Saskatchewan during 1954.

A large number of traffic accidents occur because of error and lack of judgment, skill or attention, and could be minimized or eliminated by courteous and good driving attitudes, using safe vehicles and exercising caution.

Traffic accidents represent a major problem and it is deemed advisable to interest individuals and agencies in observing and promoting safety on our roads and streets at all times.

Along with continuing to drive safely, drivers could best celebrate Victoria Day by seeing to it that over this holiday weekend, they are not responsible for any deaths or injuries due to motor vehicle accidents.

BIG BARBECUE

MEDICINE HAT, Alta.—A barbecue big enough to feed 10,000 persons and billed as the "world's largest" will be held here June 15 in honor of Alberta's golden jubilee. Jubilee officials announced yesterday that at least 200 cattle will be required for the Medicine Hat-style hot beef sandwiches. It will cost district ranchers more than \$5,000 but it is free to celebrants.

Carbon monoxide does not have an odor.

It all adds up to terrific
birthday party for Jubilee

REGINA.—Members of the community activities committee for Saskatchewan's Golden Jubilee met here recently to hear reports regarding Jubilee activities in all parts of the province. They heard details of how cities, towns, villages and rural districts are preparing local celebrations in honor of Saskatchewan's fiftieth birthday.

After the meeting all members agreed that very few places in the province will be without some form of Jubilee observance this summer. Over 200 local Jubilee committees already are organized with active chairmen and secretaries, and many more are organizing this month. It is almost certain that there will be at least 300 local celebrations, with parades, bands, sports, picnics and ceremonies in honor of district pioneers.

Terrific birthday party

"It is going to be a terrific birthday party," stated R. L. Stutt, chairman of the community activities committee, after the meeting.

In a survey of the whole Jubilee program Fred McGuiness, executive director of the Saskatchewan Golden Jubilee committee, said the visit to Saskatoon, Regina and Moose Jaw from May 13 to May 16 will focus the attention of all Canada on Saskatchewan's celebrations. The four daily newspapers and 99 weeklies are issuing special Jubilee editions at that time for distribution all over the country. The book on Saskatchewan written by Jim Wright will be on newsstands this month. A film on Saskatchewan will have its premiere about the middle of June. A condensed version will appear on the Canada Carries On series in theatres all across Canada.

A progress report by E. W. McKenzie, director of community activities, regarding community Jubilee programs this summer, was emphasized by a map dotted with colored pins to indicate the places that have their celebration plans well in hand and are just waiting until seedling is over to begin festivities. The map is dotted with pins from top to bottom and from corner to corner. According to Mr. McKenzie it will be the largest province-wide public celebration ever attempted.

Work crews started out early in May to complete the installation of 58 Jubilee markers for historic sites in the province, J. D. Herbert, Jubilee director for historic sites, announced. Eighteen of these will have full-size Red River carts and an inscription board. 35 will be in the form of large rustic markers and five will be bronze tablets. At least 20 public ceremonies are planned for these historic sites. In addition to the Jubilee markers there will be 15 or more historic spots perpetuated by some form of marker erected by private individuals or groups.

Pictorial map

As many as 150,000 voices may join in Jubilee songs in schools all over the province on Thursday, May 26, said Neil Harris, Jubilee director for musical productions, in his report to the committee. This is part of the program to "have the whole province singing during Jubilee Year."

The Jubilee Choir is singing at all "A" and "B" fairs and is appearing before as many people as possible. The mighty musical, "Saskatchewan Ho," also is entertaining varied audiences in all parts of the province.

The pageant, "Saskatchewan—The Fiftieth Year," made up on historic narrative and Jubilee singing, is being presented in at least 80 communities, with more requests for the script and song being received each week.

Special reports on Jubilee programs in their districts were given by Carl Goranson, Weyburn; Norman Roebuck, Yorkton; R. W. Harris, Gull Lake; Mrs. Anne Cusick, Codette; Mrs. H. Entwistle, Parkman; Miss Emma Stewart and Mrs. Helene Dacie, Saskatoon; Bert McKay, Moosomin.

Annual flowers

Annual flowers lend themselves to a variety of uses such as foundation plantings, borders, fillers for shrub beds and window boxes. For a nominal expenditure it is possible to have a wide range of color from spring through to late fall. In addition to their decorative value for outdoors, annuals are a constant source of cut flowers for indoor decoration.

Zinnias or petunias, sown outdoors during early May, will provide a continuous profusion of bloom from early July to late fall. Petunias are particularly useful in window boxes.

Flies dangerous

Just about now, the houseflies are about to come to life. In a matter of a few weeks, they will become parents to frighteningly large numbers of more flies, all of them carriers of disease germs. By screening doors and windows and using insect sprays, the house can be protected from a dangerous enemy.

Rice is the most used food grain in the world.

Obituaries

ANDREW BARNEs

Andrew Barnes, 47, died suddenly at his home Monday, May 24th. He was a native of Granum and district and spent his life there. He is survived by his wife, Gertrude; two daughters, Norma and Mary; five brothers, Charles of Granum; William and Stampeter of Bindloss; Robert of Carbon and John of Lethbridge.

Funeral services were held from the Jumbo Valley Church Thursday with interment in the Granum cemetery.

D.A.'S CORNER

PETTEM, D.A.
DRUMHELLER

COMMERCIAL POTATO GROWERS

Because of Bacterial Ring Rot and the Provincial Department of Agriculture efforts to stamp out this disease, it is necessary to obtain a Potato Planting Permit. Many growers have already received their permits for planting this year. Arrangements have now been made whereby you can obtain your permit by calling at this office.

CALF SHOW AND SALE MAY 28th

Two hundred and twenty calves will be offered for sale this

May 28th at the Drumheller 4-H Club Sale. The sale will be held in the Drumheller Memorial Arena and not in the Ball Park as previously announced. This is your opportunity to purchase a prime beef for your deep-freeze or locker.

MASTER FARM FAMILY AWARD

Nominations for the Master Farm Family Award will be received by this office up to June 1. Regulations governing eligibility are much the same as in former years. Nominations must be made on the form provided and are now available at this office.

HAIL SUPPRESSION NOTES

At a meeting in Swalwell May 18 the Hail Suppression Committee of Kneehill Municipality decided it would be impossible to complete organizational work in time to get a Hail Suppression contract for 1955.

It will be difficult this summer to watch hail storms destroying crops, knowing much could have been done to control their destructiveness.

All Committee members did a great job in a very busy season to get protection for us this year municipally and, although we didn't succeed due to factors beyond our control, none of the work is lost.

A great deal of necessary educational work has been accomplished and we have found what difficulties we face in organizing and getting a contract, and can now direct our efforts immediate-

ly to finding ways and means of diet and certain drugs for the first individual's physical condition, the second person may find the same program harmful if he experiments himself, without competent advice. One safe plan that any one can try in order to get rid of superfluous fat is to cut down on too rich desserts, extra frills that usually add ex-

J. T. Bishop,
Chairman of Committee.

IT MAY NOT SUIT YOU

The reducing program that brought a fat friend down to a shadow of his former self may not be at all suitable for the fat man's friend. While the doctor may have prescribed exercise, try pounds.

1905-1955

Golden

Jubilee

PLAY WRITING COMPETITION

Entries for the Jubilee Play Writing Competition will be received up to June 30, 1955. Plays must have a playing time of not less than one hour and three-quarters, but no restrictions are made as to the division of play material into acts.

Plays must be original and should be typewritten, double spaced and typed on one side of the paper only. Three plays will be bought at a price of \$250.00 per play and these plays will be made available to groups wishing to use them as part of the Jubilee activities, free of royalty during the remainder of 1955. For further information, contact

GOLDEN JUBILEE COMMITTEE
ROOM 119 — LEGISLATIVE BLDG.
EDMONTON ALBERTA

ALWAYS OBSERVE THESE SAFETY PRECAUTIONS...

- Reduce speed on highways.
- Enter main highways with caution.
- Think of the consequences before tackling difficult obstacles.
- Be careful when driving through mud.
- Turn tractor off before making adjustments.
- Watch out for steep grades.

YOUR TRACTOR CAN BECOME A DEADLY KILLER.. NEVER RELAX!

Statistics show that tractors have caused more major accidents than any other implement on the farm. We cannot stress too often, the need for constant care and vigilance when working with this "Power Packed Menace". Don't let your tractor be the cause of serious injury or death. THINK before you ACT!
